

## Summary of Minor Research Project

NAME AND ADDRESS OF THE PRINCIPAL INVESTIGATOR: Dr. Vishwasrao Sharad Hari

TITLE OF THE PROJECT: "Effectiveness of an Awareness Programme on Disaster Management for Students of B. Ed. College."

UGC APPROVAL NO. AND DATE: F.23-1230/14 General/130 (WRO) XII Plan dated 20/02/2015

DATE OF IMPLEMENTATION: 1<sup>st</sup> July 2017

TENURE OF THE PROJECT: Two Year (1<sup>st</sup> July 2017 to 30 June 2019)

### 1. OBJECTIVES OF THE PROJECT:

1: To assess the awareness of B.Ed. students regarding various disasters and Disaster management.

2: To prepare an activity-oriented program for developing awareness of B.Ed.

Students regarding various disasters and disaster management.

3: To test the Effectiveness of an activity oriented program

For Fulfilment of first objective researcher prepared a pre-test on awareness regarding various disasters and disaster management. Through this test the researcher assessed awareness of B.Ed. students. After the pre-test assessment it was clear that awareness of B.Ed. students about various disasters and disaster management was low.

To fulfil second objective the researcher prepared a program regarding various disasters and disaster management with the help of experts from different educational institutes like YASHADA Pune, SPPU Pune, This program was activity oriented and that was the main feature of the program.

To fulfil third objective (To test the Effectiveness of an activity-oriented program.) Activity oriented program was implemented on the same group. After implementation of the program post- test was administered on the same group to see the effectiveness of the program.

The post -test score of the test of B.Ed. students showed better improvement than the pre-test score of the same group because of variety of the activities conducted by the researcher. It is proved that if proper guidance and activity - oriented program is prepared to develop the awareness, it will make positive changes in the B.Ed. students.

#### **ACHIEVEMENT FROM THE PROJECT:**

In human life we cannot totally avoid disasters, but we can minimize its effects through awareness, proper training programs, and action plans for various disasters. Hence awareness of various disasters and process of disaster management among students and society is important. This may be increased through proper training.

In educational institutions like Schools and Colleges we find various types disasters. So the researcher has entirely focused on the development of awareness about different disasters, disaster management techniques, and studied its effectiveness in terms of its awareness.

So if we give the training to future teachers then our purpose will be achieved faster because these teachers will transfer these knowledge and experience to their students as well as to the society.
